DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed May 24, 2005 have been fully considered but they are not persuasive. Applicant has amended the claims and essentially argues that the claimed composite material is a formed shape and that it does not required rolling to fully integrate the copper with molybdenum are noted. This is not convincing because the limitation "a formed molybdenum particulate shape" merely means that the material has a shape. This is not patentable distinct from the plate shape of the Osada's patent. As for the argument that the plate shape Cu-Mo material of the Osada's patent requires rolling, this is immaterial because there is no patentable distinction (i.e. in properties) between the claimed composite material and that of Osada's patent. Since the composite material taught by Osada et al contains every limitations recited in claims 1 and 2, (see Osada et al. col. 7, lines 26-35), it inherently has the same mean free path and a mean center to center molybdenum particle spacing as recited in claim 3.

2. For the above reason the rejection of claims 1-3 as being anticipated by Osada under 35 U.S.C. 102(b) is maintained. The rejection was made in the previous office action is incorporated herein by reference.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
